EXPERIENCE

2022-08 – 2024-02
SW Engineer / Associate Designer – Northern Trust, Chicago, IL

- Designated designer for an engineering team supporting development of multiple features for a complex Goals Driven Wealth Management application
- Successfully launched application features including meeting agenda creation, clients' financial assets and goals management, and meeting follow up actions
- Collaborated with engineers, product managers, and business stakeholders to conduct user research, define technical requirements, and deliver designs
- Assisted in bridging the gap between developers and company's Design System to resolve issues in accessibility and responsiveness across devices

2022-06 – 2022-08
Development Intern – Aisle Rocket, Chicago, IL

- Assisted developers in authoring E-Commerce websites for Whirlpool, Maytag, and KitchenAid within the Adobe Experience Manager CMS
- Followed Agile SDLC best practices to update JIRA tickets and issues
- Collaborated with development and design interns on the Boys and Girls Club of Southwest Michigan re-brand project to design and develop a responsive, user-friendly, and modern website catering to the client's requirements
- Improved the BGC website's functionality by using dynamic pages and responsive layout for multiple brand locations

2020-01 – 2020-03
Sales Operations Intern – Surya Electronics, Glendale Heights, IL

- Researched, tested, and provided feedback on the new ERP software design (front-end and back-end) to improve functionality and development within business
- Trained team members in proper data entry and contract execution in the new ERP database and successfully transitioned office procedures into ERP within 30 days
- Monitored sales organization's compliance with corporate standards of record-keeping for customer and improved production quality by 40%
- Communicated with IT and Engineering department to resolve user interface and database issues and notify manager of updates and changes
